

Continuing a 60 Year Legacy

The Oceans are your Reservoir with Maxim

Over the last 60 years, Maxim's legacy has been and will continue to be the development of technologies that meet the needs of the industry. Maxim is a leader in heat recovery evaporators, providing a full array of engineering, manufacturing, installation, training and maintenance services. Maxim Evaporators invites you to explore the world of evaporative technology.

Maxim Evaporators represent a series of standard fresh water makers. Environmentally friendly, thermal flash designs, utilize waste heat to make the highest quality fresh water from seawater, brackish water or contaminated fresh water. Our unique thermo circulation design reduces scaling and lowers maintenance costs.

Our HJ models have fresh water capacity from 192 to 3,000 gallons per day while our TCF models range from 3,700 to 15,000 gallons per day. Custom engineered units can be designed to satisfy fresh water needs up to 1,000,000 gallons per day.

We want you to be able to make an informed decision about the technological, operational, and financial investment that comes with the purchase of a fresh water maker. As operating efficiencies become increasingly critical and as companies become more environmentally conscious, Maxim Evaporators has the technology to meet those expectations.

Maxim can employ a wide range of other evaporator technologies, including vapor compression and multi-stage/multi-effect flash. We also offer a line of sea water reverse osmosis equipment. Maxim equipment has an unsurpassed record for dependability. For years, Maxim Evaporators have been the standard for use on many U.S. Navy and Coast Guard vessels as well as many commercial marine applications of all sizes. Over 5,600 units have been manufactured and shipped worldwide for many different applications.

We are excited to talk with you about how our technology can provide you with the highest quality fresh water using a system that is simple, reliable, energy efficient, and environmentally friendly. Maxim Evaporators looks forward to the opportunity to present you with a plan on how we can meet your fresh water needs, for any application. The ocean is your reservoir with MAXIM.
