

# WATER

WITHOUT THE RISKS.

For more than three decades, H2O has provided water services for many high-profile projects and has produced billions of gallons of safe potable water. By manufacturing quality equipment and surpassing industry and government safety standards for water quality, H2O has become a leader in the energy industry. *So when we say water without the risks, you can count on it.*

Working with H2O means you can expect:

- Convenient and cost-effective water systems
- Quality equipment
- Knowledgeable water professionals
- Reliability — even in the harshest environments

H2O provides comprehensive water safety products and services through its Bluecube™ and Crapzapper™ divisions.

**bluecube™**

The Bluecube™ division specializes in potable water products and services to ensure a safe water supply.

**crapzapper™**

Focusing on the other end of the water system, the Crapzapper™ division provides wastewater treatment products and services.

**WATER WITHOUT THE RISKS.**

## RELIABLE PRODUCTS

As a leading water system equipment provider for more than 30 years, H2O products are held to the highest safety, reliability and durability standards. H2O's easy-to-use products are built to perform even in the harshest environments, and all products meet World Health Organization safety guidelines and options for ABS, DNV, ATEX, UL and CSA standards.

H2O provides proven:

- Reverse osmosis desalinators (watermakers)
- Pressure sets and hot water packages
- Potable water storage skids
- Commander Systems for potable water tank maintenance
- Oily water separators
- Hypochlorite generators

And our Crapzapper division offers:

- Marine sanitation devices

## CONSULT THE CERTIFIED WATER EXPERTS

Consulting with H2O to develop a comprehensive water safety plan helps eliminate potential risks such as cross connection and backflow incidents, unsanitary tanks and plumbing, violations of the EPA's Safe Drinking Water Act and, most importantly, health hazards to personnel.

H2O will manage your entire water operation including taking charge of safety, environmental and regulatory compliance.

All services are performed by technicians certified by the Louisiana Department of Health as Level 1 Water Plant Operators.

H2O's certified technicians are on call 24/7 worldwide to minimize risks of potential water system problems by:

- Auditing existing water storage and distribution systems
- Identifying regulatory and safety deficiencies
- Providing testing services and preventative maintenance

For new builds or full-scale retrofits, certified technicians and experienced engineers apply real-world knowledge to build reliable water systems that reduce costs and increase safety.

## RENTAL EQUIPMENT

Since not all jobs are permanent, H2O offers temporary water solutions, too. With H2O's rental water systems, you'll get the quality you expect and service you can trust.

H2O provides rental:

- Watermakers for temporary water supply needs
- Pressure sets
- Potable water storage tanks

And our Crapzapper division offers:

- Marine sanitation devices
